

EU Type Examination Certificate CML 16ATEX2152 Issue 6

- 1 Equipment intended for use in Potentially Explosive Atmospheres Directive 2014/34/EU
- 2 Equipment **APEX2 Personal Air Sampling Pump**
- 3 Manufacturer **Casella Holdings Limited**
- 4 Address **Regent House,
Wolseley Road,
Kempston,
Bedford
MK42 7JY**
- 5 The equipment is specified in the description of this certificate and the documents to which it refers.
- 6 CML B.V., Chamber of Commerce No 6738671, Koopvaardijweg 32, 4906CV Oosterhout, The Netherlands, Notified Body Number 2776, in accordance with Article 17 of Directive 2014/34/EU of the European Parliament and of the Council, dated 26 February 2014, certifies that this equipment has been found to comply with the Essential Health and Safety Requirements relating to the design and construction of equipment intended for use in potentially explosive atmospheres given in Annex II to the Directive.

The examination and test results are recorded in the confidential reports listed in Section 12.

- 7 If an 'X' suffix appears after the certificate number, it indicates that the equipment is subject to conditions of safe use (affecting correct installation or safe use). These are specified in Section 14.
- 8 This EU Type Examination certificate relates only to the design and construction of the specified equipment or component. Further requirements of Directive 2014/34/EU Article 13 apply to the manufacture of the equipment or component and are separately certified.
- 9 Compliance with the Essential Health and Safety Requirements, with the exception of those listed in the confidential report, has been demonstrated through compliance with the following documents:

EN IEC 60079-0:2018

EN 60079-11:2012

- 10 The equipment shall be marked with the following:

I M1

Ex ia I Ma

Ta = -20°C to +45°C

II 1G

Ex ia IIC T4 Ga

II 1D

Ex ia IIIC T135°C Da

CML 16ATEX2152
Issue 6

11 Description

The Casella APEX2 Personal Air Sampling Pump is a personal air sampling pump typically used to take samples of airborne materials or toxic contaminants. It is a bodily worn, battery-powered self-contained device housed within a PC anti-static enclosure. The pump is designed to provide a stable controlled flow rate of approximately 0.5 to 5 litre/min such that a known volume of air is passed through a passive sampling head and filter medium.

Airborne materials are collected onto a filter substrate and are subjected to mass or chemical analysis in a laboratory in order to establish a worker's exposure to potentially hazardous materials. Sampling pumps are typically worn on the user's belt and are connected to the sampling head via a short length of tube.

The equipment may only be recharged in the safe area using either:

1. APEX2/IS 5L Pump Five Way Charger
2. APEX2/IS 5L Pump Single Way Charger

The chargers must be supplied from a SELV source with $U_m = 63V$

These have an output of:

$U_m = 14.5V$
 $I_{max} = 850mA$

When connected to a USB in the safe area:

$U_m = 5.9V$
 $I_{max} = 85mA$

Variation 1

This variation introduces the following modifications:

To allow the following modifications to the APEX2 Personal Air Sampling Pump:

- i. The inclusion within the product description that the battery chargers must have an SELV source with a $U_m = 63V$
- ii. To permit the use of an optional protective boot.
- iii. To permit the use of additional filling holes in the battery pack.
- iv. To re-assess the circuit voltage from 5.355V to 6.0V (including circuit capacitance).
- v. To confirm circuit changes related to the motor circuit by means of spark testing.
- vi. To re-assess the rating of safety components from 7.4V to 14.5V.
- vii. To permit the Fuse F1 to be moved.
- viii. To permit the rating of R4, R7 and R231 to be altered.
- ix. To permit D1, D2, D3, D9, D10, D11 to be replaced by PMEG3015EJ diodes

CML 16ATEX2152
Issue 6

Variation 2

This variation introduces the following modification:

- i. To permit the use of Samsung INR18650-25R cells in place of the Samsung ICR18650-26F cells, within the battery pack.

Variation 3

This variation introduces the following modification:

- i. The standard has been updated to EN IEC 60079-0:2018 / IEC 60079-0 Ed. 7.

Variation 4

This variation introduces the following modifications:

- i. Change to connector type
- ii. Alternative CTI for all PCB's
- iii. Change to ICs to incorporate alternatives
- iv. Change to transistors to allow for alternatives
- v. Changes to component references in the BoM
- vi. Introduction of Barometric pressure sensor
- vii. Changes to battery pack PCB

Variation 5

This variation introduces the following modifications:

- i. Introduction of Prismatic cell.
- ii. Additional safety components added.
- iii. Change to component marking of non-safety related components.

Variation 6

This variation introduces the following modifications:

- i. Update to Applicant/Manufacturer name.

Note: Drawings that describe the equipment or component are listed in the Annex.

13 Conditions of Manufacture

The following conditions are required of the manufacturing process for compliance with the certification.

- i. Where the product incorporates certified parts or safety critical components the manufacturer shall ensure that any changes to those parts or components do not affect the compliance of the certified product that is the subject of this certificate.
- ii. The APEX2 Personal Air Sampling Pump and chargers are to be designed in accordance with general electrical safety standards e.g. IEC 60950.

14 Specific Conditions of Use

None.
